PRODUCT OVERVIEW

MusicMgr

Your whole music life, in one player.

A touch-first music library and player for serious collections — on Windows 11 and Linux Mint, controlled from your iPhone.

98,000
tracks, tested daily

11,000
artists in one library

1900
chart history goes back to

1–12 s
gapless or crossfade

EVERYDAY LISTENING, DONE BETTER

A1 — Four ways to browse
Artists, Albums, Tracks and a sortable Title Details table

A2 — Spinning turntable
Your cover becomes the record, tonearm tracking the song

A3 — Synced lyrics
Karaoke-style highlighting, with a built-in lyrics editor

A4 — Volume levelling
ReplayGain or measured EBU R128 — never clips, never rewrites files

A5 — Chart history
Billboard and Playback.fm, weekly and year-end, as playlists

A6 — Playlists and videos
Nested folders, Most Played lists, full-screen music videos

ONLY IN MUSICMGR

B1 — The Jukebox
A 45 rpm selector behind glass. Rate a song 5 stars and it lands on a cream title strip, paired A/B by artist.

B2 — The Radio
A 1950s multi-band dial: internet stations, old-time radio shows, SiriusXM — tuned through real static.

B3 — Made for 78s
Records by label and catalog number. Each side shows its own label; the turntable spins at 78 rpm.

B4 — Phone remote with Ask
Say “number ones from 1977” on your iPhone. Gemini or Claude finds it; basic requests work offline.

ONE LIBRARY, EVERY ROOM

USB sync
Two-way for music, video, radio, artwork and playlists

Signed updates
Verified before install, always asks first

Daily backups
On every close, last seven kept

Your files stay yours
Local library; missing files flagged, never deleted

NOW PLAYING — YOUR WHOLE COLLECTION
